TASC TO1 WLL Fact Sheet USGS report conclusions summary 04-03-15 508.pdf

See her final note – we should sit down at some point and talk about this and what potential options are out there.

Subject: RE: TASC Presentation on USGS Report

Hi Ben,

I brought the fact sheet about the USGS conclusions to the April CAG meeting. See attached. We didn't prepare a PPT. When I saw the April agenda, I thought making a PPT would be wasted effort. In the March meeting some Technical Committee members indicated that the fact sheet was not comprehensive enough and we considered making a longer fact sheet that described each section of the report. After discussing last night, the Tech Committee agreed that this longer fact sheet isn't needed.

The CAG Technical Committee met last night for 3 hours. It was the best meeting that I've seen between EPA and the CAG members. Brad is off to a great start in his relationship with the CAG. Everyone appreciated the information that he shared.

TASC plans based on the meeting last night include making 3 fact sheets. In order of priority, they are 1) Leachate at Bridgeton Landfill – transport, testing, permits; 2) Air Monitoring – who is monitoring, what constituents, and when; 3) Risk Assessment Basics. I'm not sure if the CAG will also want a presentation on each of these topics. Sometimes, they just want the fact sheet.

On another topic, the Tech Committee is very interested in your progress on their request to put the WLL Information Repository documents into the Bridgeton Trails branch library and getting a list of documents that should be included in the Information Repository. If we can report progress in the June CAG meeting, it will be very helpful. Next CAG meeting is scheduled for June 8 according to information given last night.

Do we have a copy of the presentation that Terri did not give at the last CAG?

Jeff
